Certified Administrator Program

Accounting Seed is excited to extend a complete, comprehensive training package to our customers and partners! The training is designed to promote a thorough understanding of Accounting Seed. To become a Certified Accounting Seed Administrator, you will need to successfully complete the following program components:

- Training lessons within each of the categories provided below
- Supporting exams for each training lesson
- Practice exercises to assess your comprehension of the app (using a trial version development org)

Join our team of Certified Accounting Seed Administrators and open a world of possibilities!

ACCOUNTING INTEGRATION | Integrating your accounting software with the rest of your business software lets you streamline your company's entire financial life cycle. This is easy to accomplish when you transition to a modern accounting system that uses a robust API. Understanding the steps towards integrating an accounting system will help guide your journey. Explore the possibilities with our Integration to Accounting Seed lesson.
